Music Theory: Introduction

What is Music Theory?

The study and understanding of the elements and structure of music. To put it simply, music theory is the key to understanding the "how" and the "why" behind the music you hear or play.

Why Learn Music Theory?

Learn Pieces of Music Faster on any Instrument or Voice

Just like using a map or GPS app will help you get to your destination faster, music theory can act as the map or GPS app to show you the way to the end of a piece of music, speeding memorization and in some cases increasing your emotional connection to the music built on understanding what is actually going on.

Get Better at Reading Music

Understanding all the intricacies of music theory will improve your ability to read music. Many things you will learn in this book will give you a stronger relationship to written music.

Strengthen Your Relationship to All the Music in your Life

Music theory will help you understand and relate to the music you are hearing, singing and/or playing. With this understanding, you will be able to play the music more accurately, with a deeper intellectual and emotional understanding and interpretation. Think about how many new things you have learned so far in your life from reading books. How much more could you learn about music from being able to read and understand what is happening in a piece of music? Music theory will make you a smarter and sharper musician when playing, writing, and studying music.

What You Will Need

- 1. This book.
- 2. The Best Music Theory Book for Beginners 1
- 3. Manuscript paper.
- 4. Pencils.
- 5. A ruler.

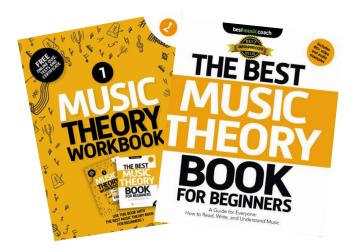

Scan the code below for our recommendations.

How This Book Works

How to Understand Exercises

You may find exercises and ideas easier to understand with a music teacher or coach. If you have not read "The Best Music Theory Book for Beginners 1" you may not understand the exercises and ideas in this book. Buy a 3rd edition copy if you have not already.

FREE Answer Keys

Download your FREE copy of the answer keys for this entire book by scanning the QR code below or at https://bestmusiccoach.com/courses/music-theory-workbook-1

FREE Online Quiz and Certificate

When you complete the final quiz for this book with 95% correct answers, you will receive an official full-color certificate of achievement that you can print out, download, share on social media and keep forever as a sign of your accomplishments in music theory.

Rhythm 1: Answers

Rhythm 1: Answers

Staff Line and Space ID

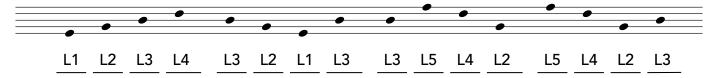

Exercise 1

Write S and the number space the dot (notehead) is in.

Exercise 2

Write L and the number space the dot (notehead) is in.

Exercise 3

A mix of lines and spaces.

Writing Noteheads

Exercise 1: Closed Noteheads

Exercise 2: Open Noteheads: Half Notes

Exercise 3: Open Noteheads: Whole Notes

Exercise 4: Open Noteheads: Whole Notes

Exercise 5: Mix

Write Stems

In the following exercises, you will practice writing stems with the correct length on each notehead. Remember to pay attention to the direction of the stem (up or down).

Stem Direction: Stem Down

On or above line 3 of the staff

Stem Direction: Stem Up

Below line 3 of the staff

Example

Add the stems for each notehead.

Example Answer

The length of each stem should be four staff lines long.

- 1. Add the stems for each quarter notehead.
- 2. All notes which are under Line 3 of the staff are stem up.
- 3. All notes above and on Line 3 are stem down.

- 1. Add the correct stems for each open notehead.
- 2. All notes which are under Line 3 of the staff are stem up.
- 3. All notes above and on Line 3 are stem down.

Exercise 3

- **1.** Add the correct stems for each quarter notehead.
- 2. All notes which are under Line 3 of the staff are stem up.
- 3. All notes above and on Line 3 are stem down.

- **1.** Add the correct stems for each quarter notehead.
- 2. All notes which are under Line 3 of the staff are stem up.
- 3. All notes above and on Line 3 are stem down.

Writing Bar Lines

There are many different types of bar lines in music, which are used not only to separate measures, but also to separate different parts of a song.

Reminder: The three most common types of bar lines are:

- 1. Regular Bar Line (these are used to separate measures)
- **2.** Double Bar Line (these are used often to separate sections or show the end of an exercise that does not happen in regular measures)
- 3. End Bar Line (these are used to end the song)

Exercise 1					
Copy the bar lin	es from the top staff b	y writing them onto th	ne bottom staff.		
			T		
F					
Exercise 2		. (()		rc	
Copy the double	e bar lines from the to	p staff by writing them	onto the bottom stat	†.	
			П	П	
Exercise 3					
	ar lines from the top st	taff by writing them or	nto the hottom staff		
copy the initial b		tan by writing them of	nto the bottom stan.		
					

Writing Time Signatures

The time signature is an important part of written sheet music. In these exercises, you will practice writing your own time signatures.

Remember: The two time signatures which you have learned so far are $\overset{4}{4}$ and $\overset{3}{4}$. Remember that in order to write the time signature, you place two large numbers on top of each other.

The **upper number** of the time signature takes up the space from line 3 to line 5 of the staff

The **lower number** of the time signature takes up the space from line 1 to line 3 of the staff.

Exercise 1

In each blank measure, write the time signature for **4**.

Exercise 2

In each blank measure, write the time signature for ${f 4}$.

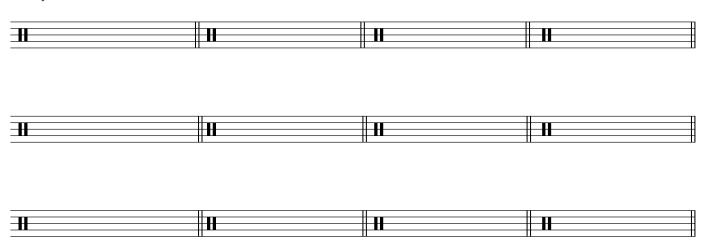

Writing Percussion Clefs

To write a percussion clef:

- 1. Write two vertical lines from the 4th line of the staff to the 2nd line of the staff.
- 2. Make the lines thick.

Exercise

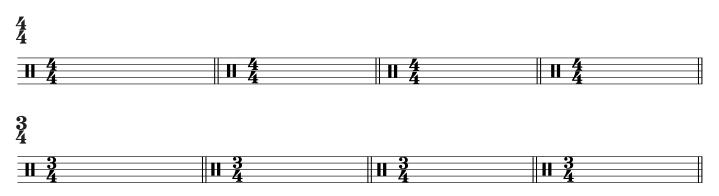

Using the above steps, fill in the following 12 measures with percussion clefs. The first one of each line is already filled in for you.

The other name for a percussion clef is "neutral clef".

Writing Percussion Clefs and Time Signatures

1. Write a percussion clef then the indicated time signature in every measure.

Space Notes on the Staff

Space Notes on the Staff: $\frac{4}{4}$

In this exercise, write the noteheads on Line 3 of the staff above each number. The numbers show which beat of the measure each note starts on. Look to the next number to see how long the first note will last. You are trying to figure out if you need to write a whole, half, or quarter note. Pay attention to the spacing of your notes and how many beats (4) should be in each measure.

Example

Example Answer

1. Write all noteheads on line 3 of the staff with stem down for half and quarter notes.

Exercise 3

Space Notes on the Staff: $\overset{3}{4}$

In 4 time signature has 3 beats per measure. This is because the top note in a time signature always shows the number of beats in each measure.

Example

Example Answer

1. Write all noteheads on line 3 of the staff with stem down for half and quarter notes.

Exercise 1

Rhythm 2: Answers

Strong and Weak Beats

It might not seem important now, but the strong and weak beats are REALLY important for when you start to understand and break down your favorite songs and understand music.

Strong and Weak Beats in $\overset{4}{4}$

Write the order of song and weak beats!

Strongest Weak Strong Weakest

Strongest Weak Strong Weakest

Strongest Weak Strong Weakest

Strong and Weak Beats in $\overset{3}{4}$

Write the order of song and weak beats!

Exercise 4

Exercise 5

Pitch and Notes 4: Answers

Interval Identification 1

Interval Direction

Exercise 1

Interval Quality

Exercise 1

Major = M Minor = m Perfect = P Diminished = d Augmented = A

Exercise 2

Write the abbreviations for the possible qualities for each interval.

U can be P 2 can be m or M 3 can be m or M 4 can be P or A 5 can be P or d

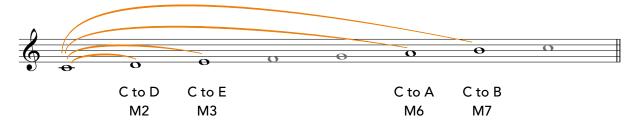

6 can be m or M 7 can be m or M 8 can be P

Interval Identification 2: Harmonic Intervals

Easy Major Scale Intervals: C

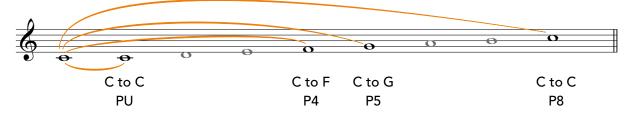

Major Intervals = M

Major intervals align with $\hat{\mathbf{2}}$, $\hat{\mathbf{3}}$, $\hat{\mathbf{6}}$, and $\hat{\mathbf{7}}$ of the major scale. 2nds, 3rds, 6ths, and 7ths can be major.

Perfect Intervals = P

Perfect intervals align with $\hat{1}$, $\hat{4}$ and $\hat{5}$ of the major scale. Unisons, octaves, 4ths, and 5ths are perfect.

This means that all harmonic intervals that have C as the lowest and use notes from a C major scale will be either M or P. This is a shortcut for any harmonic interval where the lowest note is C.

Interval Distance + Quality

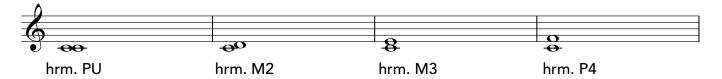

- 1. Count up from C to the highest note in the interval to get the "some kind of..." interval distance.
- 2. If the highest note in the interval is a note from the C major scale, the interval quality is either M or P.

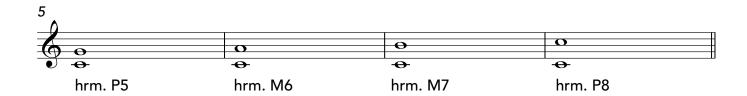

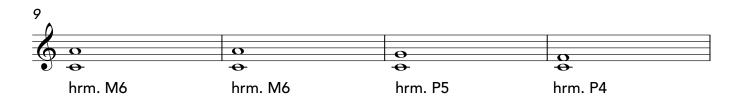

Harmonic Intervals: C

You are in "easy major scale land" and qualities can be M, P, and U.

- **1.** Figure out the "some kind of" interval distance.
- 2. Both notes are from a C major scale. The quality is either U, M, or P.
- 3. Write the interval direction, quality, and distance in the blanks below the staff.

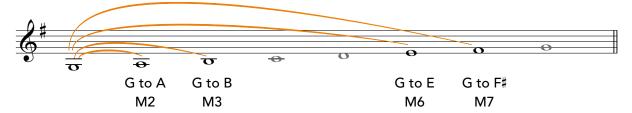

Easy Major Scale Intervals: G

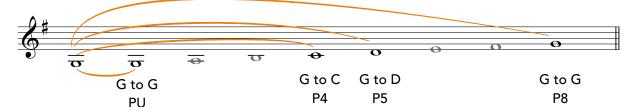

Major Intervals = M

Major intervals align with $\hat{\mathbf{2}}$, $\hat{\mathbf{3}}$, $\hat{\mathbf{6}}$, and $\hat{\mathbf{7}}$ of the major scale. 2nds, 3rds, 6ths, and 7ths can be major.

Perfect Intervals = P

Perfect intervals align with $\hat{\mathbf{1}}$, $\hat{\mathbf{4}}$ and $\hat{\mathbf{5}}$ of the major scale. Unisons, octaves, 4ths, and 5ths are perfect.

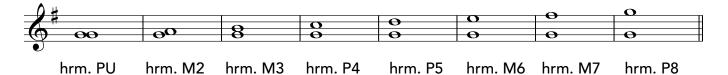

This means that all harmonic intervals that have G as the lowest and use notes from a G major scale will be either M or P. This is a shortcut for any harmonic interval where the lowest note is G.

Interval Distance + Quality

- 1. Count up from G to the highest note in the interval to get the "some kind of..." interval distance.
- 2. If the highest note in the interval is a note from the G major scale, the interval quality is either M or P.

Harmonic Intervals: G

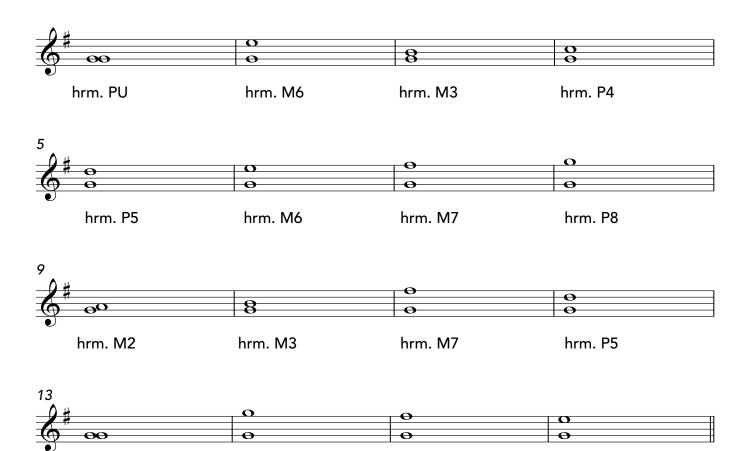

hrm. PU

You are in "easy major scale land" and qualities can be M, P, and U.

1. Figure out the "some kind of" interval distance.

hrm. P8

- 2. Both notes are from a G major scale. The quality is either U, M, or P.
- 3. Write the interval direction, quality, and distance in the blanks below the staff.

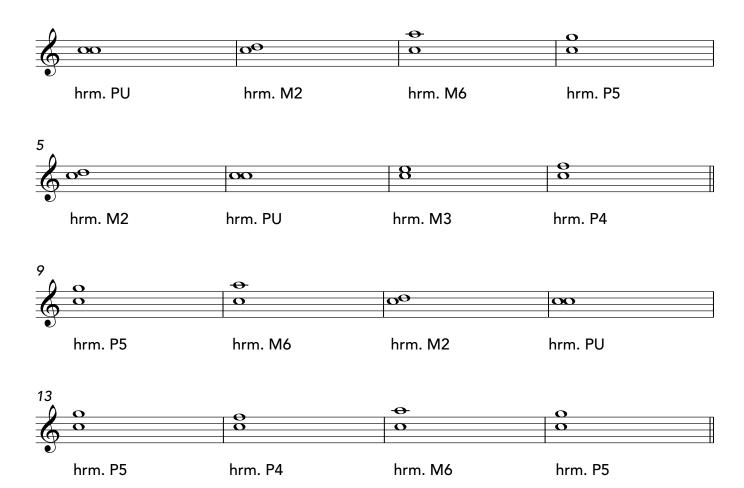

hrm. M7

hrm. M6

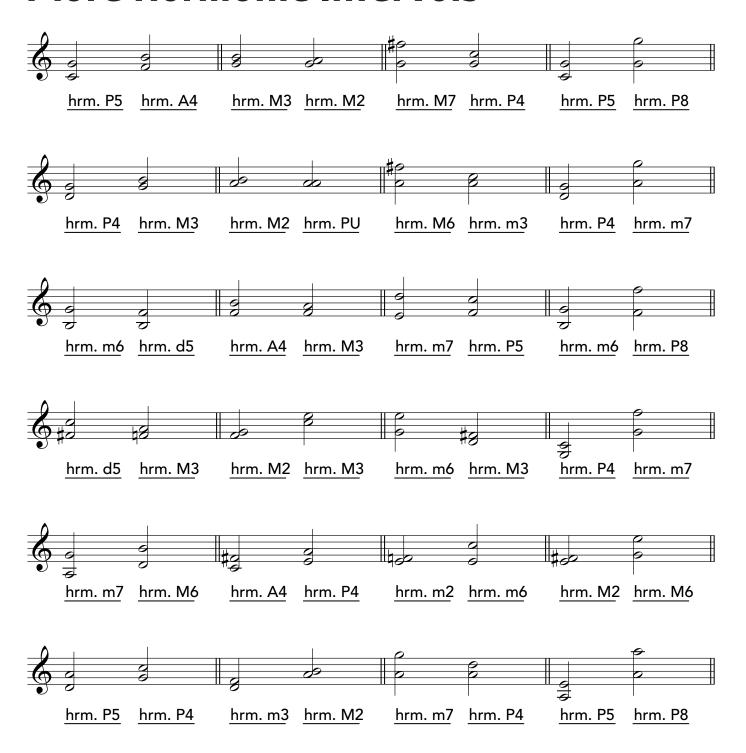

Harmonic Intervals: Some More Practice

You are in "easy major scale land" and qualities can be M, P, and U.

- 1. Figure out the "some kind of" interval distance.
- 2. Both notes are from a C major scale. The quality is either U, M, or P.

Write the Triad Intervals 2: Reminder

Write the interval quality and distance (PU, m2, M3, m3, M4, P4, P5) in the blanks.

Between the root and third of all major triads there is an interval of a M3

Between the third and fifth of all major triads there is an interval of a m3

Between the root and fifth of all major triads there is an interval of a P5

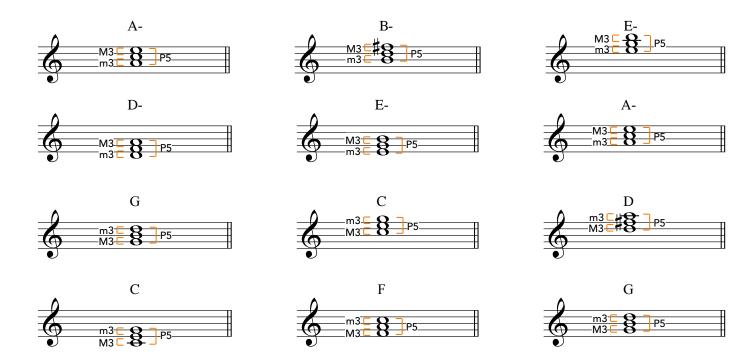

Between the root and third of all minor triads there is an interval of a m3

Between the third and fifth of all minor triads there is an interval of a M3

Between the root and fifth of all minor triads there is an interval of a P5

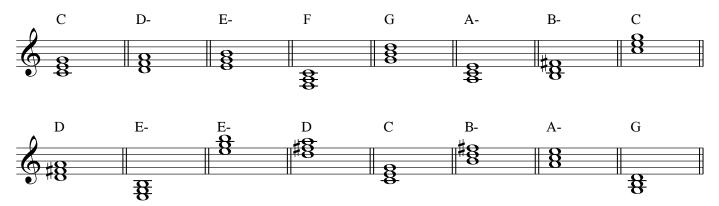

Label the Triad Intervals and Chord Symbols

- 1. Write the interval quality and distance (PU, m2, M3, m3, M4, P4, P5) next to the brackets.
- 2. Write the chord symbol for each triad above the staff.

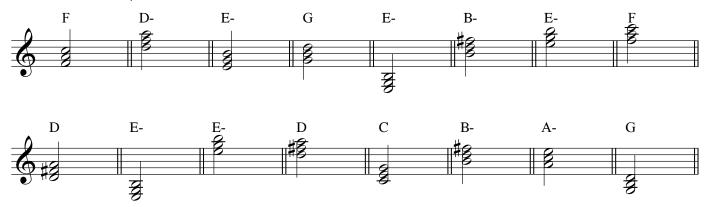

Writing Triads with Accidentals 2

Write Triads with Whole Notes

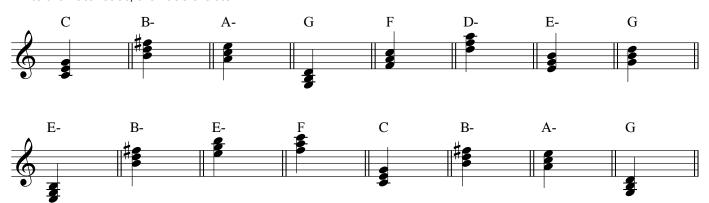

Write Triads with Half Notes

Write the noteheads, then add the stem.

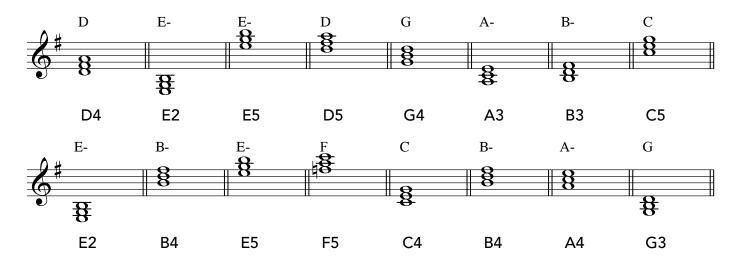

Write Triads with Quarter Notes

Write the noteheads, then add the stem.

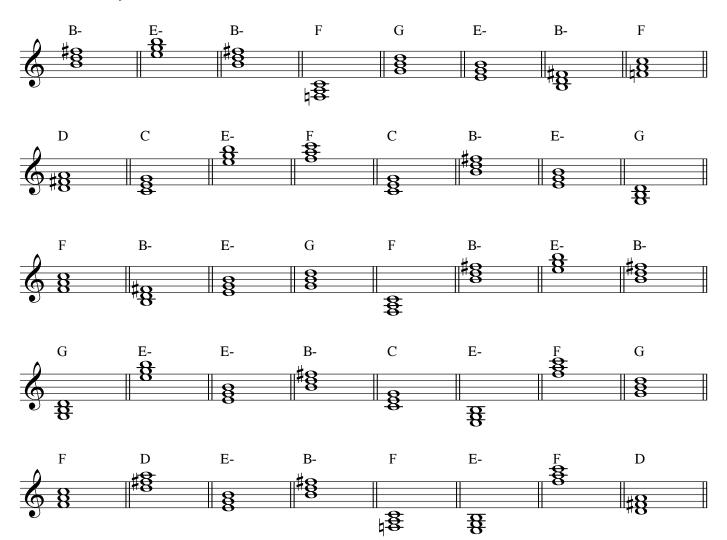

Writing Triads with Key Signatures 2

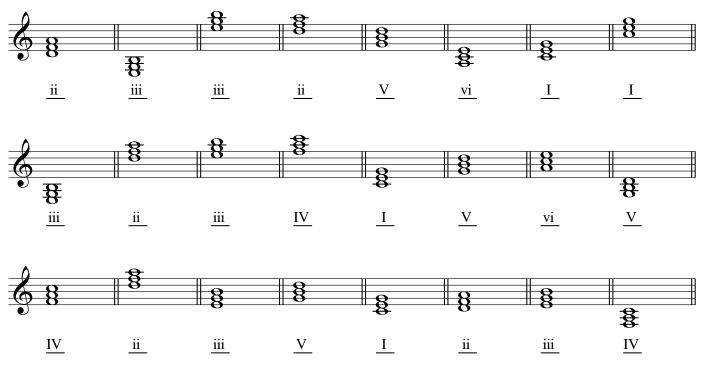

Triad Identification

Write the chord symbol for the written triad above the measure for each triad.

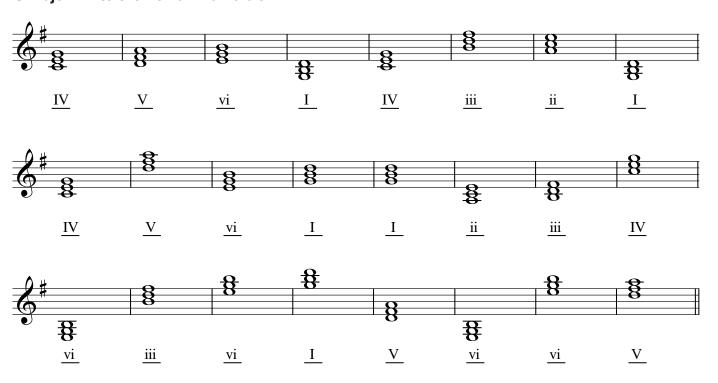

Writing Roman Numerals: Major Scales and Keys

C Major Write the Roman Numerals

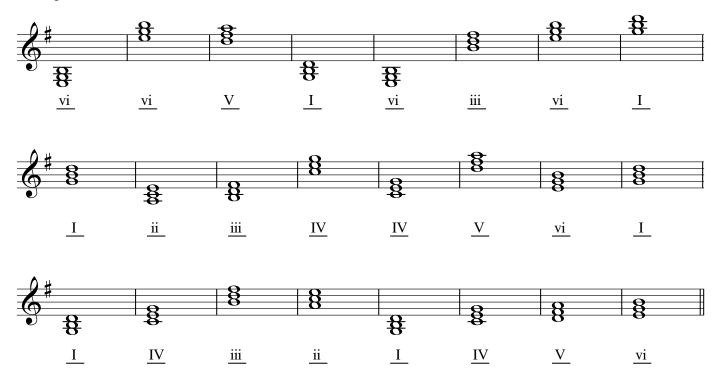

G Major Write the Roman Numerals

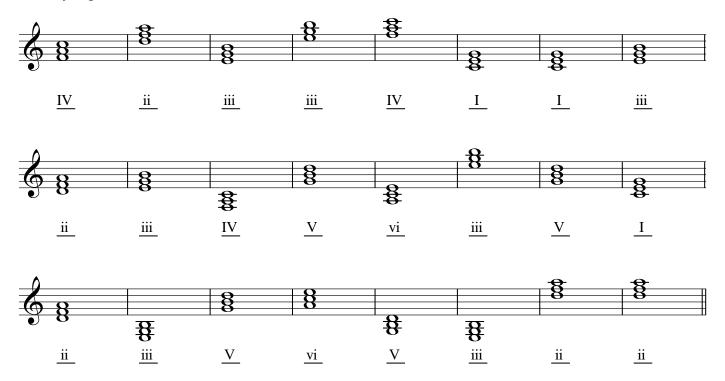

G Major Write the Triads for the Roman Numerals

The answer key for this exercise shows only one particular triad. As long as you have the right chord root and quality, it counts as a correct answer. For example, if you write an A- triad starting on A4, but the answer key has an A - triad starting on A3, it is still a correct answer.

C Major Write the Triads for the Roman Numerals

The answer key for this exercise shows only one particular triad. As long as you have the right chord root and quality, it counts as a correct answer. When the same RN is repeated, challenge yourself to write it in a different octave as the answer you gave for that RN earlier in the exercise.

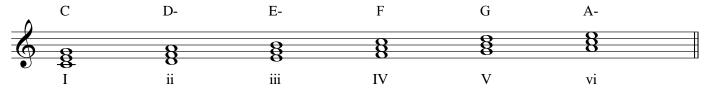

Writing Major Scales Harmonized to the Fifth

See p. 116 of The Best Music Theory Book for Beginners 1 for a full walk-through on harmonizing major scales.

With Accidentals

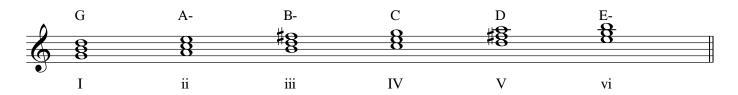

C Major Scale Harmonized to the Fifth

Start on the provided note and harmonize the C major scale to the fifth to **6**. Add accidentals when needed. Add roman numerals below each chord and chord symbols above each chord. Start on the note provided.

G Major Scale Harmonized to the Fifth

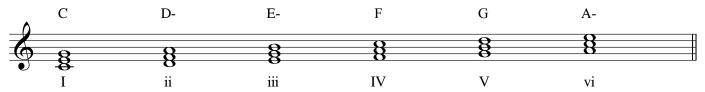

Start on the provided note and harmonize the G major scale to the fifth to $\hat{\mathbf{6}}$. Add accidentals when needed. Add roman numerals below each chord and chord symbols above each chord. Start on the note provided.

With Key Signatures

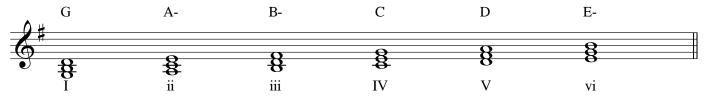

C Major Scale Harmonized to the Fifth

Start on the provided note and harmonize the C major scale to the fifth with a key signature to **6**. Add roman numerals below each chord and chord symbols above each chord. Start on the note provided.

G Major Scale Harmonized to the Fifth

Start on the provided note and harmonize the G major scale to the fifth with a key signature to **6**. Add roman numerals below each chord and chord symbols above each chord. Start on the note provided.

Writing Roman Numerals: Natural Minor Scales and Keys

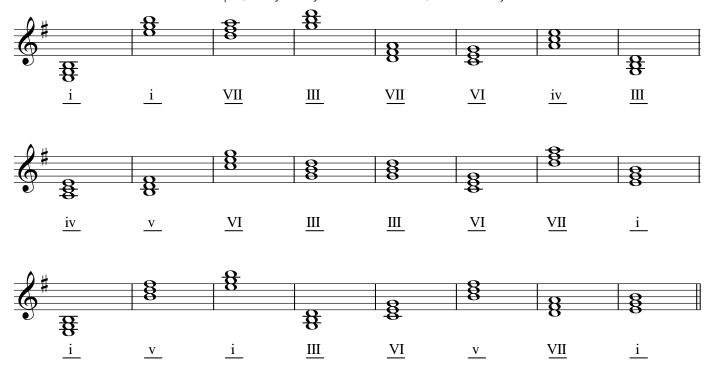

In the following exercises, you will practice writing and identifying roman numerals in the keys of A and E minor.

A Minor Write the Roman Numerals

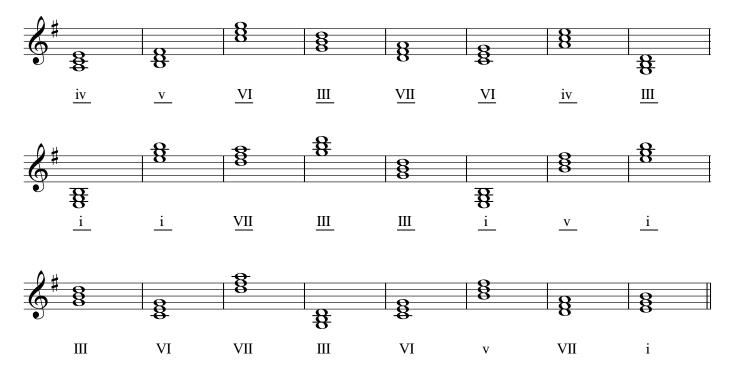

E Minor Write the Roman Numerals

Remember that in the E minor example, every time you see the note "F," it is actually an F#.

E Minor Write the Triads for the Roman Numerals

The answer key for this exercise shows only one particular triad. As long as you have the right chord root and quality, it counts as a correct answer. For example, if you write an A-triad starting on A4, but the answer key has an A-triad starting on A3, it is still a correct answer.

A Minor Write the Triads for the Roman Numerals

The answer key for this exercise shows only one particular triad. As long as you have the right chord root and quality, it counts as a correct answer. When the same RN is repeated, challenge yourself to write it in a different octave as the answer you gave for that RN earlier in the exercise.

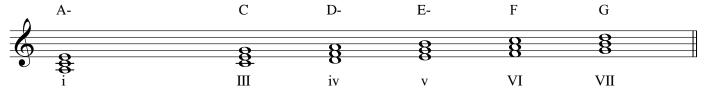

Writing Natural Minor Scales Harmonized to the Fifth

See p. 118 of The Best Music Theory Book for Beginners 1 for a full walk-through on harmonizing natural minor scales.

With Accidentals

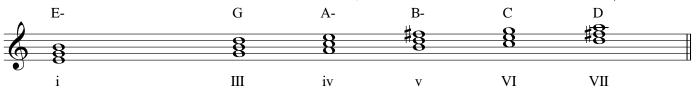

A Natural Minor Scale Harmonized to the Fifth

Start on the provided note and harmonize the A natural minor scale to the fifth, skipping $\hat{\mathbf{z}}$. Add accidentals when needed. Add roman numerals below each chord and chord symbols above each chord. Start on the note provided.

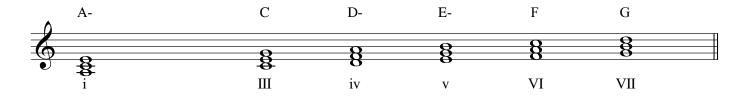

E Natural Minor Scale Harmonized to the Fifth

Start on the provided note and harmonize the E natural minor scale to the fifth, skipping $\hat{\mathbf{Z}}$. Add accidentals when needed. Add roman numerals below each chord and chord symbols above each chord. Start on the note provided.

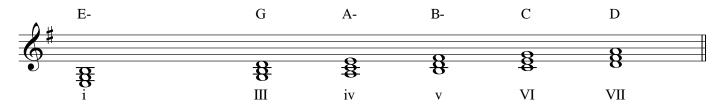

With Key Signatures

E Natural Minor Scale Harmonized to the Fifth

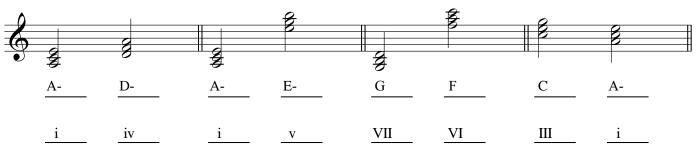

More Triad Identification

- 1. Write a chord symbol to represent the triad.
- 2. Write a roman numeral to show how the triad relates to the key.

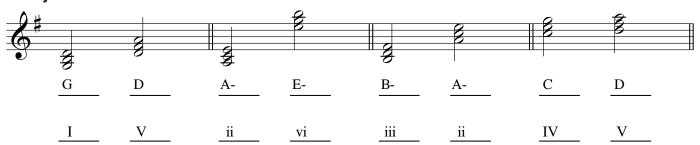

C Major
